## The Time to Act is NOW

As long as death is certain and its coming is uncertain, every man with responsibility must admit that the time to act is now. In its sixty-four years of history the Mutual Life has paid its policy holders 738 millions because they acted on the idea that the time to act is now. This vast sum would have been vastly greater had it included the patronage of men with equal means, in equal health, with equal needs, who failed to apply the truth that the time to act is now.
